TRANSPORTING YOUR FISH:

When hauling your fish, it is very important NOT to use city water, which may contain chlorine. Pond or lake water is best. Large garbage cans or stock tanks are ideal to use when transporting catfish. Five-gallon buckets may be used for hauling 4" - 6" catfish, at a rate of 25 to 35 fish per bucket. Buckets may also be used for transporting all species of fish. Tanks and water are not supplied for the transfer of fish. LIMITED SUPPLY OF SOME SPECIES.
